### **DETAILED ACTION**

1. The application filed 11/4/2003 is presented for examination and claims 1-11 are pending.

#### ***Allowable Subject Matter***

2. Claims 1 to 11 are allowed.
3. The following is an examiner's statement of reasons for allowance: the claimed invention is directed to a control circuit.

Independent claims 1 and 5 identify and uniquely distinct feature "feedforward means for measuring the cathode current supplied to the cathode of the display and for adding to said monitoring voltage a compensation voltage corresponding to said cathode current, low-pass filtered with a second time constant corresponding to the duration of a small number of lines and high-pass filtered with said first time constant".

Independent claim 11 identifies a uniquely distinct feature "measuring the cathode current supplied to the cathode of the display and adding to said monitoring voltage a compensation voltage corresponding to said cathode current, low-pass filtered with a second time constant corresponding to the duration of a small number of lines and high-pass filtered with said first time constant".

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Onozawa et al. (5,717,296).

The closest art, Onozawa et al. as discussed above, either singularly or in combination, fails to anticipate or render obvious the above limitations obvious.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
